

Does your company need 4WD vehicles or buses?

Then it's time to talk to Buses + 4WD Hire.

With over 40 years experience in the vehicle hire and leasing industry.

The result for you? We're now in a better position than ever to offer long term or short term vehicle solutions for major infrastructure construction and mining projects, especially those requiring buses and 4WD vehicles.

In the Fact Sheets that follow and on our website, you'll find details of the types of vehicles we offer plus the range of standard extras available. Ask our friendly staff for information about the projects we've been involved with.

On a major project entailing 50 vehicles, we provide a permanent site workshop that can service ALL your on site vehicles. Of course, the more remote the site, the greater the benefit in terms of optimised fleet utilisation.

Benefits of contract hiring... the more you look into the benefits of hiring our vehicles for a specific period, the better it gets.

Advantages include:

- › reduce capital outlay
- › your fleet can be fully maintained on site
- › no long term lease commitment
- › in field servicing
- › immediate availability of back up vehicles
- › fully tax deductible hire costs
- › fixed monthly cost option
- › no capital approval required
- › contract hire is off balance sheet unlike leasing
- › all vehicles comply with strict site safety standards
- › full fleet reporting

In addition to 4WD vehicles, we offer coaches, buses and 2WD vehicles.

We also quote on any other specific vehicle needs.

Why lease or buy the old fashioned way? CONTRACT HIRE!
